

Deriving lessons from Exemplars worldwide

The **Exemplars in Global Health (EGH)** program is a global coalition of partners including researchers, academics, experts, funders, country stakeholders, and implementers. Our mission is to identify positive global health outliers, analyze what makes countries successful, and disseminate core lessons so they can be adapted in comparable settings. We aim to help country-level decision makers, global partners, and funders make strategic decisions, allocate resources, and craft evidence-based policies. A small, core team supporting EGH is based at Gates Ventures, the private office of Bill Gates, and closely collaborates with the Bill & Melinda Gates Foundation.
